Description

This 45-minute, professionally-produced interactive video will take you through the ins and outs of common hacking techniques. Filled with real-life examples and insightful tips, Security Awareness Training will help you keep your vital data and business reputation safe.

Thoughtful questions and exercises will also take you through typical scenarios that bad actors use to gain access to your network and even get access to your physical offices so they can steal your business information.

Pricing Information

Training pricing can meet most budgets and we do offer a discount for existing customers. Consider offering this video to all your employees, including new hires and anyone who works with your sensitive business data.

Getting Started is fast and easy

We can have you and staff set-up with the video as soon as you need. For more information, contact Matt@IconiumNetworks.com or call us today at (440) 991.9980.
